

Nokia Places for wordpress plugin

Share information about your favorite places or search for a new places to visit

The Nokia places for wordpress plugin allow editors to search and inject places into the post or into the page. The plugin uses Nokia Places API for place searching and results displaying.

Features

- Simple installation - no need for additional configuration: adds one simple button to a media insert/upload section;
- Supports dashboard QuickPress;
- Simple use: search using keywords, choose a place from a list and insert the place widget into the editor;
- Plugin provides two templates for place widget: default and custom;
 - Default template provides such information as place name, address, contact details, location map, rating, reviews;
 - Custom template can be changed by editing /templates/custom/ .css or/and .html files according to Nokia Places API rules;
- Convenient implementation: in html tab only a single shortcode that do not disturb you while editing the source code:
`[nokia template="default" place="276u336x-bd6d8e8fdc5e4504b5b2840ce8ed3c82"]`
 - nokia - defines that the work is with Nokia Places API;
 - template – defines the place widget template;
 - place – defines unique place ID you want to add;
- On the resulting page the shortcode is changed to the <div> container and JavaScript which dynamically adds content to the page showing the latest information of the place;
- Supports all Nokia Places API features such as changing rating, resizing map, switching photos, showing on map, sharing after publishing the place widget;

Specifications

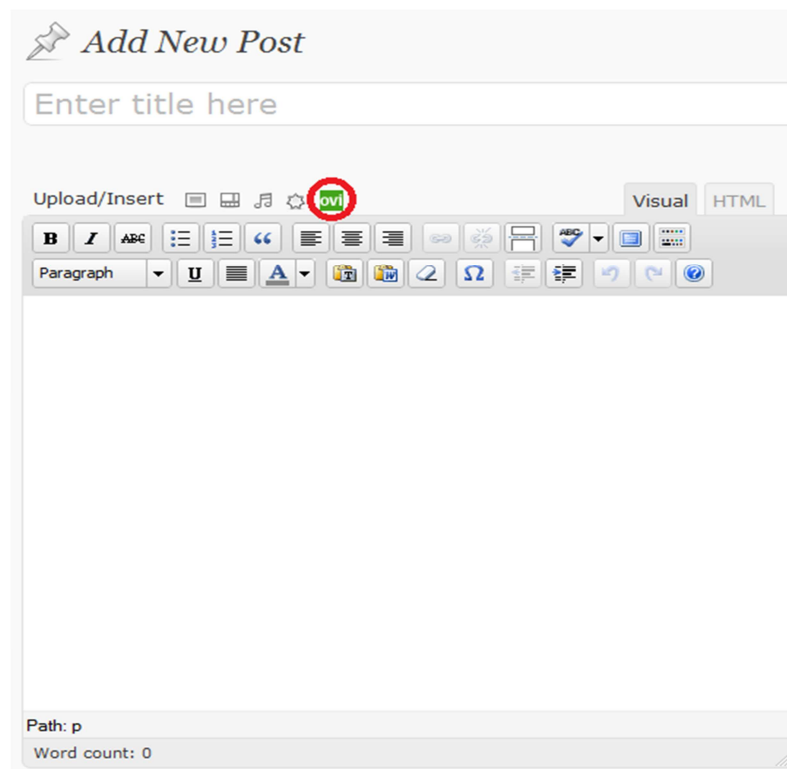

- Supports wordpress 2.8.6 and above
- Fully supports IE9/IE8/Opera/Chrome/Safari

Installation

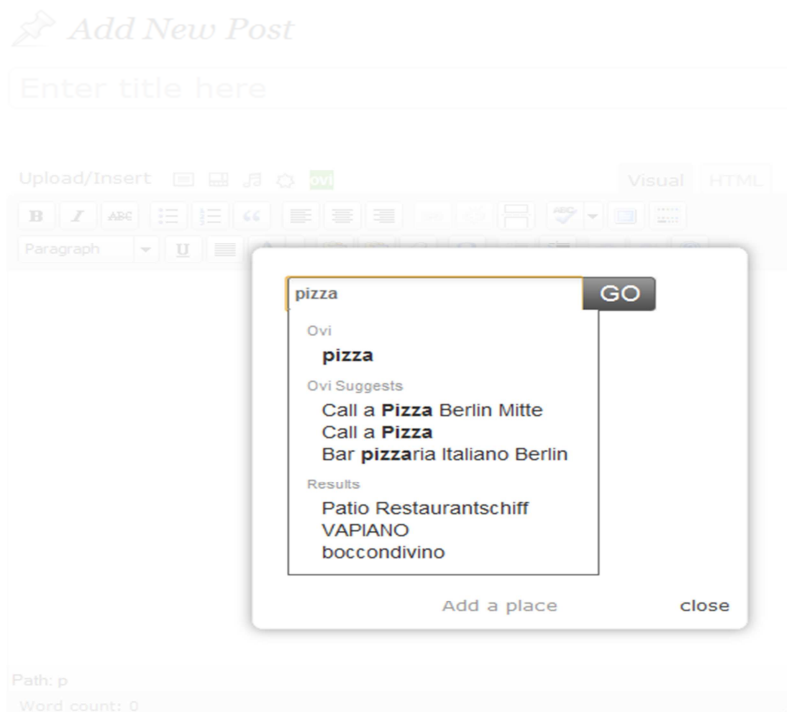

All steps should be taken in 'Plugins' menu in Wordpress

1. In case you are updating the plugin, delete any existing nokia places plugin, clear browser cache
2. Upload a .zip file containing nokia places plugin
3. Activate the plugin

Il Punto
Top Restaurant. Klasse italienische Atmosphäre und sehr leckeres Essen. Sehr stilsicher eingerichtet und daher immer wieder gerne....

Il Punto
Diese italienische Speisekarte bietet mal etwas andere italienische Spezialitäten - und zwar aus Süditalien (Neapel). Ich kann das Restaurant sehr empfehlen besonders, wenn man einen repräsentativen Rahmen zum Essen sucht. Die Bedienung ist sehr kompe...

Il Punto
Der beste Italiener Berlins ohne Michelin Stern! Trotz der hohen Qualität der Speisen und des Services ist die Atmosphäre sehr locker und unkompliziert, die Burata Morzarella mit Garnelen ist sensationell und muss probiert werden!...

Known issues:

- No visual in WYSIWYG editor in Firefox
- Does not support IE7 and below

FAQ

I have typed a keyword to the search input and pressed enter / go button but nothing happened. What's wrong?

It means that nothing was found during the search or there was a problem with a network. Try writing different keywords (3 characters minimum).

I have chosen a place from the list but it is not loaded and showing only spinner instead of it, waited N-minutes. Should I wait more?

It means that there were some problems getting the data (i.e network). Try picking different places from the list and then back to the place you wanted.

I have inserted the place into the editor but it shows me the spinner instead of the place. What's wrong?

Same as above there can be some issues getting the data. Try switching Visual <=> HTML tabs.

I have added two places one after another but in the resulting page only one is present, instead of the second only place shortcode is present. What's wrong?

Make sure that you have at least a whitespace between two shortcodes, wordpress can't recognize two shortcodes one after another.
